What the hell is going on here ??? This petition did not come before the council from there it would go to the court but if we tabled it to find out the legality of the names it would die there, because for one (. That is the sign in sheet for the tribal office and two one name that I saw on their he was still in prison and didn't vote in the last election so that makes this invalid already the other name I see I have a signed affidavit from him that he didn't know what he was signing and wants his name struck from that petition so there's no legality to this
